takeAction
 μ Smalltalk method
 in class `RecurringEvents`, 433

in class Student, 440a
takeAction
 in the protocol for **Student**, 437
takeARobot
 μ Smalltalk method
 in class **Lab**, 434a
takeWhile
 μ ML function, 698
term
 in the μ Prolog interpreter, 529a, 715a
termString
 in the μ Prolog interpreter, 709
time-limit
 μ Smalltalk method
 in class **RobotLabSimulation**, 437b
time-now
 μ Smalltalk method
 in class **Simulation**, 430
time-now
 in the protocol for **Simulation**, 429
timeNeeded
 μ Smalltalk method
 in class **AlternatingStudent**, 442b
 in class **Student120**, 441b
 in class **Student**, 439b
timeNeeded
 in the protocol for **Student**, 437
timesRepeat:
 μ Smalltalk method
 in class **Integer**, 461d
timesRepeat:
 in the protocol for **Integer**, 426
timeWaiting
 μ Smalltalk method
 in class **Student**, 439a
timeWaiting
 in the protocol for **Student**, 437
toArray
